1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4, 5, 7-11 and 13-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Anderson et al. (3,067,977). Anderson discloses a ball valve B including a flexible annular seat 30 as shown in figure 4 with a base 38, a cantilevered portion 36, a thin connecting portion formed by the curved surface 39, a retaining ring 32 and a support ring 34.

3. Claims 1-4, 6, 7, 9, 12 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Stein (5,137,259). Stein discloses a ball valve 14 including a flexible annular seat as shown in figure 4 with a base 26, a cantilevered portion 34, a thin connecting portion between sections 36 and 34 and retaining rings as are the elements forming ports 16 or 18 both of which elements include a cavity 24.

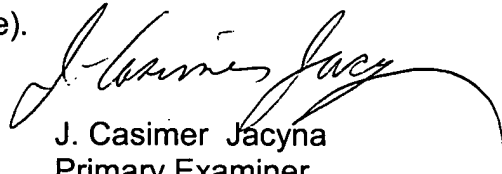

4. Claims 1-5, 7-9 and 13-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Williams et al. (4,671,308). Williams discloses a ball valve C including a flexible annular seat as shown in figure 3 with a base adjacent 128, 106, a cantilevered portion at 102 and adjacent 132, a thin connecting portion formed adjacent either of the corners of 132 that border 102, a retaining ring 14 and a support ring 100.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references cited on the PTO-892 teach other cantilevered valve seats for rotary valves.
